Location:

Marriott Seattle Airport
3201 176th Street
Seattle, WA 98188

Course Content: Closing the Learning Gap for All Complex Kiddos, Students, & Patients – All Engaged, All Communicating, All Learning!

Students and patients with complex disabilities are often challenged to communicate, engage and learn. Teachers and therapists can be puzzled as how to best build communication with those who are nonverbal and severely motor challenged. Academic and therapeutic instruction can be difficult in light of these obstacles. This workshop will present soft and high tech communication strategies that support even the most challenged student in their communication growth and literacy development. Demonstration of academic supports and strategies that help aid learning to read and write will help students that often get left behind in these areas. Robust videos will highlight strategies and methodologies. Participants will leave with specific strategies for supporting our most complex learners and a renewed belief in their patients' and students' underlying abilities, regardless of their diagnosis!

For questions, call 972.800.1012 or email roger@gp2c.org

Course Director: Susan Norwell, M.A., Special Education

Susan Norwell has worked with a wide array of students, including those with Rett Syndrome, Autism, Cerebral Palsy and multiple disabilities for the last 40 years. She has spent the last 29 years in private practice working primarily with children on the autism spectrum and girls who have Rett Syndrome. She is trained in "Greenspan's Floortime" model and would consider herself a relationship-based educational specialist. Susan's current focus is in teaching literacy skills to children without verbal language and with significant disabilities while integrating augmentative communication and technology supports. She consults with various school districts on successful education of children with Rett Syndrome and those on the autism spectrum and has presented workshops worldwide. Susan is a high-energy consultant who is known for her broad knowledge base as well as practical and creative ideas for furthering the learning of those with the most significant challenges.

Susan is Co-Founder of Rett University, which represents a 5-year dream of being able to provide systematic training for parents and those working with individuals with Rett. She is thrilled to see this dream actualized with Girl Power 2 Cure, Inc. and envisions people being able to more consistently unlock potential for individuals with Rett in the future!!

Tobii Dynavox Training

Identifying Communication Ability Levels and Moving AAC Users Beyond Requesting

Requesting is an easy and concrete strategy that we often use when first introducing Augmentative and Alternative Communication (AAC) solutions to individuals with significant communication challenges. But, what happens next? What happens when we run out of things to request? What happens when the AAC user seems bored and unmotivated? When we assume competence, it is imperative that we move AAC users to higher levels of communicative competence.

In this session, we will discuss strategies for developing skills that move beyond requesting…into the world of asking questions, making comments, protesting, expressing opinions, and other communicative functions. We will use lecture, discussion, and video examples, to explore the power of various communicative functions, vocabulary selection, teaching strategies, and specific ways to support communication beyond requesting.

Tobii Dynavox Presenter: Patrick Brune, MS CCC-SLP

Patrick Brune, MS CCC-SLP, has over 25 years of clinical experience in the area of AAC. He has been working with Tobii Dynavox for the past 7 years and is part of their Training and Implementation team. His focus has been on developing tools and supports that create successful communication opportunities for all our customers. Patrick has presented at local, national and international conferences about AAC topics.
