

LANGUAGE SYSTEM

Can this language system allow my AAC user to communicate about anything and everything in their current and future environment? Is this page set user friendly for editing?

COMMUNICATOR

This application is great for learning how to read and write, especially for accessing eye-gaze friendly books. Can this device access this application in any way?

EYE GAZE SYSTEM

Does the eye gaze hardware have a wide range of access? Would my child/student have to stay in a specific place in order for eye gaze to work?

AAC DEVICE TRIAL

What are your state/insurance requirements for a device trial? Are the devices and pagesets being trialed comparable to each other?

AAC Device Features for Eye Gaze

GAZE VIEWER

Does this device have the ability for me to track where my AAC user's eyes are focusing?

DEVICE MOUNTS

Does this device sit on a table on its own? Do I need a table stand? A wheelchair mount? A floor stand? Which is the most functional right now?

REMOTE ACCESS

Can someone remote access into this device in order to model language or troubleshoot during a virtual session or teletherapy?

NON-GLARE GLASS

Can this device be used outside or in different lightings without restrictions?
